# Is Over Acidification Making You Sick?

**Are You Tired...Run Down...

## The Danger of Over-Acidification

Science has linked over-acidification in the body to almost every disease known. If your body is too acidic, it's just a matter of time until your health deteriorates and your immune system becomes over-stressed.

Today, over 95% of the foods we love to eat are acid-forming: meat, cheese, rice, cereal, cookies, crackers and more. Harmful organisms like yeast, molds, bacteria and fungi, all flourish in acidic environments.

## Is There Help? YES!

You need at least 5 servings of high alkaline *fruits and vegetables a day—or just one serving of MegaGreens.* This exclusive formula is packed with over 25 super-charged ingredients brimming with probiotics, vitamins, herbs, minerals, and enzymes vital for good health.

Just mix with water, drink and you'll feel the difference as highly concentrated and ultra-alkaline MegaGreens helps shift your body from an acidic to an alkaline state.

### Garcinia Cambogia

- Promotes Accelerated Weight-Loss
- Supports Increased Serotonin Levels

The rind of *Garcinia Cambogia*, a small, pumpkin-shaped fruit native to India and southeast Asia, contains a substance called *Hydroxycitric Acid (HCA)*. It's also reported to help increase Serotonin, a neurotransmitter believed to affect mood, social behavior, appetite and digestion, sleep, memory and sexual desire and function.

So if you want to feel better and lose weight at the same time, *Garcinia Cambogia* can help. Each capsule contains *Calcium 130mg Chromium (as Chromium Picolinate) 400mcg Garcinia Cambogia Extract (rind)* (Standardized to contain 50% *Hydroxycitric Acid (HCA) (salt form)*).
